

# Products Portfolio

Investment funds originating from the  
BB Asset + JGP partnership

We started the partnership with the **launch of the fund** BB Espelho Renda Fixa JGP **Equilíbrio IS** Crédito Privado.

*Development of financial engineering capable of financing projects that act **against deforestation**.*

*The fund finances, for example, a project by Belterra, a company focused on **restoring degraded areas**. This initiative seeks to generate 700 direct jobs and **restore an area of 4 thousand hectares**. 545 thousand tons of carbon will be removed in ten years; that would offset the annual emissions of more than 430 thousand gasoline-powered cars.*

*Solution for retail investors: **short liquidity window (redemptions paid in 5 days)**; access to a differentiated strategy with a low initial investment value (**R\$100.00**); expectation of alignment between **attractive performance** and sustainability (ESG also provides positive returns!)*

*High capacity, allowing wide distribution and funding for numerous projects that will have a **positive impact on the environment and society***

# First investment solution of the Partnership

We will soon launch the **FIDC Belterra**

The Land Restoration Project aims to *rehabilitate a degraded area* through the establishment of an *integrated agroforestry system* involving the cultivation of banana, cocoa, cassava and native wood. This project not only seeks to restore land, but also creates a sustainable and profitable agricultural enterprise. By combining different crops and timber production, the project will provide environmental benefits, generate income and uplift local communities.

The proposed project will be established as a Specific Purpose Company, bringing together financial support from partners such as JGP, Cargill and Vale Fund.

+29K planted trees

545,262 Carbon Credits

4,000 hectares

Coming Soon...

### Who is Belterra?

Beltterra was founded in 2020 with the aim of making viable the large-scale implementation of Agroforestry Systems. That is a proven effective methodology for regenerating soil health, restoring the natural landscape and restoring biodiversity needed to be scaled up.

Beltterra is a B Certified company, UN Global Company and selected by UpLink, the World Economic Forum's innovation platform.
